

KX9970R

5K DisplayPort KVM over IP Receiver

Re-Envision Control Rooms with 5K and Robust System Reliability

Zero-Latency IP Extension, Native DisplayPort Processing with 12-bit Deep Color

KX9970

5K DisplayPort KVM over IP Extender

As workplaces face restructuring and decentralization is inevitably enforced, control room operations are being challenged to pivot effectively throughout these safety protocols in the new normal. Despite manpower shortages, managing escalations with secure, precise, and timely data from real-time monitoring and dynamic collaboration has become measurably more mission-critical than ever.

The **KX9970T** is a high-performance KVM over IP transmitter that allows connection to a DisplayPort computer and enables secure, remote, and uninterrupted access to the computer from a 5K DisplayPort KVM console connected to a KX9970R receiver over an Intranet or a dedicated LAN. With the receiver console installed at a separate location from the transmitter within a standard IP network, mission-critical control room operations become more ergonomic, user-centered, and task-oriented, while remaining separate from any adverse environmental interference.

The KX9970 expands on previous models with support for up to 10 Gbps optic fiber network connection, transcendent 5K audiovisual performance, speedy peripheral data sharing, and many other new features. This future-proof [KVM over IP Matrix](#) System solution, incorporating flexible extender connections, visual collaboration, and system control, aims to streamline control room workflows to jump start operators' productivity with KVM over IP agility.

Connect

Native DisplayPort Signal Processing with 12-bit Deep Colors

The essence of information visualization is in presenting the vividness of image coloring (ex. broadcast post production, meteorological analysis, etc). Powered by native DisplayPort signal processing with 8/10/12-bit color depth, the KX9970 delivers stunning visualization with a wider color spectrum comprising Adobe RGB / sRGB / YCbCr / YUV color spaces, facilitating lossless video compression over real-time KVM over IP data transmission.

Pixel-Perfect 5K Audiovisual Performance

The KX9970 revamps control room desktop operations with optimum image quality of 5K@60 Hz@4:4:4. Aided by the graphics card's dithering effect, the KX9970 brings a wider array of luminosity with smoother image rendering, providing an impactful user experience to considerably uplift control room productivity.

Spectacular Video FPS to Facilitate eSports Broadcasting

With eSports booming and beginning to rival traditional sports leagues in viewership, it's more important than ever to broadcast impeccable coverage of global gaming events and tournament where every tiny detail is crucial to viewers. The KX9970's support for 1920x1080@240Hz (CVT-RB) / 2560x1440 @144 Hz allows broadcasting producers to seamlessly switch live between on-scene players and gaming feeds without experiencing any impactful lag or interruption while the video is being streamed.

Enhanced Isochronous USB Transmission

In addition to peripheral sharing (such as cameras, microphones, speakers, and more), the USB peripheral ports are capable of isochronous transfer communication to facilitate USB data transmission at a higher rate.

**Fail-Safe System with Network/Power Redundancy**

The KX9970 provides network/power redundancy that reinforces system reliability by maintaining uninterrupted operations and seamless power failover during any contingency. The KX9970 extenders are equipped with two SFP+ modules and one RJ-45 port to allow fiber and copper network connections, ensuring real-time data transmission and robust system uptime.

Panel Array™ Mode to Maximize Remote Console Efficiency

In tandem with [CCKM \(KVM over IP Matrix Manager\)](#), the operator at each remote console connected to a KX9970 receiver can benefit from ATEN's Panel Array™ mode that enables simultaneous view of video sources from multiple transmitters in 2x2 up to 6x6 multiview layout on one screen.

Effortless KVM over IP Extension

The KX9970 guarantees secure, extendable, and [zero latency KVM over IP](#) data transmission with no distance constraint to expedite real-time situational awareness for control room management. Extended data is bolstered with AES 256-bit encryption before transmission over the network and decrypted at the receiver for disclosure.

KVM over IP Control Access as Emergency Measure

The [KX9970T](#) comes equipped with a PS/2 port for connection to a KVM over IP Access Control Box ([2XRT-0015G](#)), which can be used to stop all remote receiver connections in times of emergency to allow technicians to perform timely troubleshooting and required maintenance at the local console.

Collaborate

Comprehensive Video Wall Collaboration to Reinforce Teamwork Efficiency

When integrating with the video wall, the KX9970 features ATEN's patented [Boundless Switching](#) which allows operators to intuitively switch control from one computer to another by moving the mouse cursor across screens, in order to respond to any incident with escalated awareness. Furthermore, all screen contents can be "pushed" and "pulled" for prompt collaboration, sharing, and troubleshooting as required between workstations and the video wall, facilitating a streamlined control room workflow to maximize informed decision making.

Control

KVM over IP Matrix System for Control Rooms of the Future

The KX9970 deployment is flexibly scalable, allowing point-to-point, point-to-multipoint, multipoint-to-point, and multipoint-to-multipoint installations to accommodate a multitude of industrial applications. The KX9970 extenders can be mixed and matched in a matrix configuration for installation, and this [KVM over IP Matrix](#) System allows for effortless and centralized management of all extender connections via [CCKM](#) – the [KVM over IP Matrix](#) Manager's web GUI or an iPad app.

KVM over IP Matrix System

Applications

The KX9970 is perfectly suited to mission-critical control room applications where [secure KVM](#) over IP agility, real-time monitoring, and ergonomic desktop operations are demanded, including broadcasting NOCs, ATC towers, & production line monitoring. It is also ideal for professional gaming.

Features

The KX9970R 5K DisplayPort KVM over IP receiver is a high performance IP-based Single Display receiver, where the transmitter can transmit a computer's keyboard, video, mouse, and USB signals to the receiver for providing separate console accesses from both the transmitter's and receiver's locations. The setup allows extended access to computer systems via a USB console (USB keyboard, USB mouse, DisplayPort monitor) over Intranet, enabling users to place the computers in secure and temperature-controlled environments, which may be isolated from the user workstation.

The KX9970R support one DisplayPort video display for delivering video resolutions of up to 5K (5120 x 2880 @ 30 Hz), and offer flawless and lossless video quality with zero latency. The KX9970R is equipped with one RJ-45 port and two SFP+ slots. 10-Gbps SFP+ fiber module expansions are supported for fiber optic network connections and a transmission distance of up to 10 km. For connection flexibility, both the KX9970 transmitter and receiver models can be connected either directly to each other or via a high-speed network over a copper-based or fiber-based LAN. The KX9970R also features dual power supply capability for power redundancy to ensure reliable services. The KX9970R can be set up at the workstation, mounted onto a wall or at the rear of a rack with its [space-saving 0U rack-mount design](#).

As an IP-based matrix extender, the KX9970R can be installed in flexible configurations, including point to point, point to multipoint, multipoint to point, and multipoint to multipoint. When combined with the [KVM over IP Matrix Manager \(CCKM\)](#), it can be integrated into a [KVM over IP matrix](#) system (multipoint-to-multipoint) for providing more flexible applications in different working environments.

By integrating [CCKM](#) with KX9970R, IT administrators can benefit from advanced features such as auto detection of all KX9970R devices on the same subnet for the sake of fast installation or configuration, username / password authentication and authorization, and the ability to define different types of connections that can be switched and shared. Security features of the KX9970R include 256-bit AES encryption for secured data transmissions, as well as RADIUS, LDAP, Active Directory, TACACS+ for 3rd-party authentication services. In conclusion, the KX9970 offers the most convenient solution for providing full digital extension over a network for control room applications, such as air traffic control (ATC), traffic management centers, and broadcast distribution monitoring systems.

Note:

The SFP+ module ([2A-141G](#) / [2A-142G](#)) is sold separately. Contact your ATEN dealer for product information.

For the latest list of compatible network switches, please visit: [ATEN Support Center](#) for more information.

Advanced Features ¹

- Lossless video compression up to 5120 x 2880 including UHD or DCI with zero latency
- Native DP signal processing with color depth 8, 10, 12 bits
- Supports Adobe RGB
- Supports USB isochronous transfer to enable USB camera and USB speaker usage between transmitter and receiver
- ATEN Matrix Link – allows users to instantly link transmitters and receivers to perform real-time port and profile switching on an iPad
- Boundless Switching – simply moves the mouse cursor across screen borders to switch between different receivers (Rx)
- Fast Switching – 0.3-second switching between transmitter-connected servers of any resolution
- Authentication lock – automatically logs in when the power of the system is resumed after power off
- Connection redundancy – automatically connects to another transmitter (Tx) after disconnection with the original Tx, ensuring constant access to servers
- Disconnection alert – Pop-up warning message and looping alarm beeping notify users the disconnection status
- Push and Pull – shares content instantly to/from a single Rx or video wall by just one click
- Video walls – creates multiple video walls with up to 12 x 12 (144 displays max.) in each layout
- Advanced Scheduling – improves efficiency and saves costs by allowing connections to be set based on time and date
- Virtual Transmitter – independently streams video, audio, USB, and serial sources from different Tx
- Internal and external authentication support – supports LDAP, Active Directory, RADIUS and TACACS+
- Advanced User Authorization Settings – administrators can set up to four access modes on Tx devices for collaboration or prevention of interference among users
- Configurable user and group permissions for access and control of KX devices
- Tx grouping of up to 4 sets of KX transmitters to support multi-display applications
- Rx access control – users at the Tx local console can enable / disable Rx control privilege by simply pressing a control button ²

Note:

1. These advanced functions are supported when the KX transmitters are paired with KX receivers and managed by [CCKM](#).
2. The KVM over IP Access Control Box ([2XRT-0015G](#)) is sold separately. Contact your ATEN dealer for product information.

Hardware

- The housing meets IEC 60945 standards for maritime control room use and has passed environmental tests
 - Supports 32:9 ultra-wide resolution
 - Supports DisplayPort video resolutions – up to 5120 x 1440 @ 60 Hz (4:4:4), 5120 x 2880 @ 30 Hz (4:4:4), 4096 x 2160 @ 60 Hz (4:4:4), 1920 x 1080 @ 240 Hz (4:4:4) (CVT-RB), 2560 x 1440 @ 144 Hz (4:4:4)
 - DisplayPort 1.2
 - Stereo speakers and microphone support
 - High speed USB Storage Transmission support
 - Auto-MDIX – automatically detects cable type
 - Built-in 8 kV / 15 kV ESD protection and 2 kV surge protection
 - Supports power redundancy – KX9970R has 2 DC jacks for power redundancy
 - Supports network failover – 1 RJ-45 & 2 SFP+ slots for network failover to ensure constant availability for mission-critical applications
 - Supports 10-Gbps SFP+ fiber module expansions for up to 10 km³
 - Rack Mountable – Mounting options:
 - [2X-021G](#) Dual Rack Mount Kit
 - [2X-031G](#) Single Rack Mount Kit
 - Includes an industrial-grade power adapter – supports operating temperature of 0°C -50 °C to ensure durability and adaptability under harsh environmental conditions
- Note: ³The SFP+ module ([2A-141G](#) / [2A-142G](#)) is sold separately. Contact your ATEN dealer for product information.

Management

- Integration with [KVM over IP Matrix Manager \(CCKM\)](#) – a software enabling easy configurations of all KX devices with an intuitive web-based GUI
- Dual console operation – controls user's system from both the transmitter's and receiver's keyboard, monitor, and mouse
- OSD (On Screen Display) – enables configuration of both Tx / Rx devices on the receiver's display screen
- EDID Expert™ – selects optimum EDID settings to prevent video compatibility issue caused by different monitors
- On-screen Preview (Panel Array™ Mode) – allows users to view the video of up to 36 displays on one screen
- Video Compression Level – allows users to increase / decrease the video quality to adjust for appropriate network bandwidth
- Command Line Interface – administrators can control all KX devices via RS-232 or Telnet by issuing commands or 3rd-party application
- Supports Hotkey Commands
- RS-232 serial ports – allows users to connect to a serial terminal for TextMenu, CLI, or to serial devices such as touch screens and barcode scanners
- All KX Tx models are compatible to be used with all Rx models

Security

- Dedicated LAN port for KX direct connections – can be isolated from the corporate network
- Secured data transmission – 256-bit AES encryption for all data being transmitted from the transmitter to the receiver
- Supports industry standard Transport Layer Security (TLS) protocol

Virtual Media

- Virtual Media mode enhances data transmission performance, and is ideal for file transfers, OS patching, software installations and diagnostic testing
- Supports USB 2.0 DVD / CD drives, USB mass storage devices, PC hard drives and ISO images
- Supports smart card / CAC reader

Specifications

Connectors	
USB Port	2 x USB Type A Female (White)
Console Ports	2 x USB Type A Female (White) 1 x DisplayPort Female (Black) 1 x Mini Stereo Jack (Green) 1 x Mini Stereo Jack (Pink) 1 x DB-9 Male (Black)
Power	2 x DC Jack (Black)
LAN Ports	1 x RJ-45 (Black) 2 x SFP+ Slot
Switches	
OSD	1 x Pushbutton
