

US401

4-Port USB Peripheral Switch

US401 allows 4 computers to share the same USB peripheral (e.g. printer, scanner and modem) under the foundation of one-at-a-time. Users can switch the computer controlling the peripheral from the reliable electronic button. There are LEDs indicating the status of the connection port.

Features

- Enables four computers to share a single USB peripheral device.
- Electronic switching to select the active PC.
- Both PCs and Macs can connect up at the same time.
- 100% iMac compatible.
- Bus powered.
- Hot pluggable - USB devices can be plugged in and removed without having to reset the system.
- OS Support: Windows 2000, Windows XP, [Windows Vista](#), Mac and FreeBSD

Specifications

Computer Connections	4
